Dear NAN Member,

It is important and advantageous to update your membership status when you qualify for a new level. Attached is information regarding the procedure for upgrading your membership status in the National Academy of Neuropsychology. The procedure requires that you submit the following: 1) a copy of your current curriculum vitae, and 2) a completed and signed membership upgrade application. In cases where sponsors are required, at least one must be a member of the National Academy of Neuropsychology, the International Neuropsychological Society, or Division 40 of the American Psychological Association. Associate, Post-Doctoral/Early Career and Affiliate members are encouraged to review the attached information to determine if they are eligible for Professional membership. Also, Student members who are no longer enrolled in full-time academic programs should upgrade their memberships to the Affiliate, Associate, Post-Doctoral/Early Career, or Professional level.

When these materials are received, your request will be processed by the Membership Committee and you will be notified as soon as possible of the decision regarding your request. If you have any questions, please feel free to contact me.

Sincerely,

Sue R. Beers Ph.D.
Chair, Membership Committee

SRB/tlb

NATIONAL ACADEMY OF NEUROPSYCHOLOGY

Information Regarding Upgrading Membership Status

Associate, Post-Doctoral/Early Career, Affiliate, and Student members who wish to change their membership status may do so after meeting the requirements for membership at the desired level.

Associate and Post-Doctoral/Early Career members may apply for membership at the Professional level after obtaining a total of three years experience, at least two of which must be postdoctoral. Upgrading to the Professional level from the Associate or Post-Doctoral/Early Career levels require submitting a curriculum vita and a signed membership upgrade application. This change must be formally requested and does not automatically occur after having been an Associate or Post-Doctoral/Early Career member for a period of time. Sponsors are not required when upgrading from Associate and Post-Doctoral/Early Career level membership to Professional membership status.

Affiliate members, because they were not required to submit names and contact information of two sponsors at the time they joined the Academy, must do so to upgrade to the Associate, Post-Doctoral/Early Career or Professional levels. If applying to the Professional level, Affiliate members must also meet the requirements for Professional membership that are outlined below.

Occasionally, Affiliate, Associate and Post-Doctoral/Early Career members return to school and request to change their membership status to the Student level. Student membership is intended only for those individuals who are currently enrolled in full-time academic programs; those in post-doctoral training positions are not eligible for Student membership. However, those returning to full time postdoctoral work are eligible for the Post-Doctoral/Early Career membership rate. Changing membership status to the Student level requires a letter from the member requesting the change and a letter from the student's training director, advisor, or university registrar verifying enrollment in the academic program.

Upon completion of their graduate degrees, students upgrade their membership status to Associate or Post-Doctoral/Early Career by submitting one copy of the curriculum vita and a completed and signed membership upgrade application, including the names and contact information of two sponsors who have expertise in neuropsychology who can serve as references. At least one of those neuropsychologists is to be a member of the National Academy of Neuropsychology, the International Neuropsychological Society, or Division 40 of the American Psychological Association. **Please note that this change also must be formally requested and all dues must be current. Students upgrading to Associate level must include a \$75 upgrade fee. Students upgrading to the Post Doctoral/Early Career level must include a \$25 upgrade fee and a letter from their training director attesting to their post-doctoral status.** In the absence of a formal request for a change in membership status, Student members will be upgraded to the Affiliate level upon completion of their Ph.D. degree.

Send application, payment (if applicable) and current CV to:

Membership Category for which you are applying (Check one):

- Professional Membership** requires that the applicant have completed academic coursework in the assessment and/or remediation of neuropsychological conditions and hold a doctoral degree in psychology or a related discipline from an accredited university. S/he shall have worked in a setting where such knowledge is applied for a minimum of three years, two of which must be postdoctoral.
- Post-Doctoral/Early Career Membership** is available for two years after completion of a doctoral degree in psychology for those who are completing post-doctoral supervision/studies leading to psychology licensure. Student members who meet the eligibility requirements for Post-Doctoral/Early Career status may make application to the Membership Committee by written request and verification that the aforementioned criterion has been met. Post-Doctoral/Early Career members do not have voting privileges, may not hold office; but may be members of committees.
- Associate Membership** requires that the applicant hold a master's degree in psychology or a related discipline or hold a doctoral degree in psychology or a related discipline but have less than three years' applied experience.
- Affiliate Membership** is open to interested individuals whose training and experience preclude them from other levels of membership.

Applications for upgrading from Student to Affiliate, or Associate and Post-Doctoral/Early Career to Professional do not require sponsorship. *If applying for upgrade to Associate, Post-Doctoral/Early Career or Professional membership from Student or Affiliate membership*, please obtain the contact information of two sponsors who have expertise in neuropsychology and can be contacted to attest to your training and experience in this specialty. At least one of your sponsors must be a member in good standing with the National Academy of Neuropsychology, Division 40 of the American Psychological Association, or the International Neuropsychological Society.
